

Hello all,

Please refer to these articles to install MySQL workbench and server on Ubuntu OS. (First install MySQL server and then workbench)

<https://www.digitalocean.com/community/tutorials/how-to-install-mysql-on-ubuntu-18-04>

<https://linuxize.com/post/how-to-install-and-use-mysql-workbench-on-ubuntu-18-04/>

Just for your reference here are the commands that need to be executed on the ubuntu terminal:

- `sudo apt update`
- `sudo apt install mysql-server` (First install server)
- `sudo mysql_secure_installation`
- `sudo apt install mysql-workbench`

We will be working on MySQL workbench to execute queries and learn SQL so please be ready by installing the required software.
